Overview of JUnit Testing

Mocking with JUnit

Java Testing: An Introduction to TDD

Parameterized and Dynamic Testing in JUnit

May 29, 2024

Vo Luong Phuong Nam

has successfully completed the online, non-credit Specialization

Java Testing

In this Specialization, learners developed essential skills for today's dynamic workforce, including essential techniques for testing Java code, Test Driven Development, Parameterized Tests, Dynamic Tests, without writing extensive test scripts. This Specialization also focused on building and enhancing Enterprise Applications, a test-first approach to developing Java artifacts, foundational Mocking, and Junit, ensuring all essential techniques for testing Java code were covered. Learners utilized a lab environment to test and create on their own to utilize their new skills.
